

Community air monitoring data is reviewed and compared to specific NYSDEC/NYSDOH approved criteria, known as “Action Limits”. As a result of this evaluation process, site conditions are categorized into two categories, “Operational Condition” and “Action Condition”. The “Operational Condition” is applicable when the data is below the “Action Limits” noted in the table below. The “Action Condition” occurs when one or more fifteen minute average measurement for Dust (PM<sub>10</sub>), Total Volatile Organic Compounds (TVOC), Naphthalene or Odor Intensity exceeds the background or upwind measurement by the “Action Limits” in the table below. During the period from 6/28/10 through 7/4/10 there were six Fixed and two Portable Air Monitoring locations measuring TVOC and PM<sub>10</sub>. **Fifteen-minute averages for PM<sub>10</sub> and TVOC data remained in the Operational Condition.** However there were elevated concentrations above the Action Limit as described in the following paragraph.

On Monday, June 28 and Tuesday, June 29, 2010 there were periods of elevated PM<sub>10</sub> concentrations at Fixed Air Monitoring Site 1 (FAM 1). On Monday the elevated concentrations were caused by high relative humidity. On Tuesday, June 29, the elevated concentrations were caused by exhaust from a generator in the vicinity of FAM 1 as well as high relative humidity. All elevated concentrations were reduced below the Action Limit after background subtraction. Therefore, the site remained in the operational condition (see Table 2).

PM<sub>10</sub> = Respirable Particulate Matter (dust)

TVOC = Total Volatile Organic Compound

ppm = Parts per million (by volume)

µg/m<sup>3</sup> = Micrograms per cubic meter

All reported PM<sub>10</sub>, TVOC, and odor intensity values represent 15-minute averages.

\* Wind Directions are presented by octant (i.e. N, NE, E, SE, S, SW, W, NW)

\*\* Background concentrations are equal to the upwind concentrations unless winds are determined to be variable.

<sup>1</sup> In accordance with DER-10 this type of event is not considered to be an exceedance because the elevated concentrations did not exceed the Action Limit.
