Community Air Monitoring Program 10/05/09 through 10/11/09

Community air monitoring data is reviewed and compared to specific NYSDEC/NYSDOH approved criteria, known as "Action Limits". As a result of this evaluation process, site conditions are categorized into two categories, "Operational Condition" and "Action Condition". The "Operational Condition" is applicable when the data is below the "Action Limits" noted in the table below. The "Action Condition" occurs when one or more fifteen minute average measurement for Dust (PM₁₀), Total Volatile Organic Compounds (TVOC), Naphthalene or Odor Intensity exceeds the background or upwind measurement by the "Action Limits" in the table below. During the period from 10/05/09 through 10/11/09 there were six Fixed and one Portable Air Monitoring locations measuring TVOC and PM₁₀. Fifteen-minute averages for PM₁₀ data remained in Operational Condition.

There were no elevated readings for TVOC or PM₁₀ for the monitoring period.

Weekly Data Summary Report National Grid – Rockaway Park Former MGP Site – Rockaway Park, NY Reporting Period (Monday – Sunday): Start Date: 10/05/09 End Date: 10/11/09
